

08-11-92

Federal Communications Commission  
Washington, D.C. 20554

Attn: Honorable Alfred Sikes, Chairman

Honorable Chairman,

I respectfully request that the commission enters this brief letter as part of reply comments to docket No. 92-105. It is brief and aims at supporting with specific examples the need for a fair policy when it comes to N11, abbreviated dialing and other numbering resources.

First, I have had a record of interaction with Pacific Bell for nearly 6 months. Recently, at the conclusion of a 120 day process, I expressed the desire to implement market testing for a new convenience feature. Attached is Pacific Bell's reply to my specific request for "211".

I was told by one of their representatives that Pacific Bell did not expect to ever offer any abbreviated dialing unless it was "Absolutely mandated" by the F.C.C. This attitude and behavior reinforces the feeling I expressed in my first set of comments. A clear message must be sent to these LEC's that they will no longer be in a position to manage these public resources and manipulate the market to limit competition.

As a second example of this unacceptable behavior, I have requested unsuccessfully from NANP on 3 occasions information about network identifier numbers.

Attached is copy of my 3rd request. I have received no information acknowledgement--nothing whatsoever. I will leave it to you Chairman and to the commissioners to decide what this total disregard means in terms of the future of telecommunications in America. Unless the FCC gets very tough, this monopolistic apparatus will continue to ignore all attempts to bring choice, innovation and value to the American public. The commission has just outlined a favorable position for LEC's in terms of video dialtone.

It should now let them know that they will have to give in the area of abbreviated dialing.

Respectfully,

Los Angeles, Ca 90036

**RE: Request for "211" abbreviated dialing access**

Dear Mr. Masek,

We have reviewed your specific request for "211" abbreviated dialing access in connection with the alternative solution Pacific proposed for facilitating a live trial of your enhanced service in the Beverly Hills area in October of 1992. This alternative solution was described in Pacific's 120 Day Response letter dated July 14, 1992. In that letter we also addressed Pacific's position regarding your original abbreviated dialing capability request. Our position remains the same. Pacific is awaiting the FCC's ruling on the Notice of Proposed Rulemaking CC Docket No. 92-105, and will be evaluating the next appropriate steps based on the decision regarding assignment of N11 access codes.

Since the resolution of the complex issues associated with three digit access is apt to take a long period of time, we would encourage you to consider a seven digit access code arrangement. We would be more than willing to help you design and implement this alternative arrangement.

Regards,

Jacie Voegeli

Memorandum

To: Ron Conners, NANP

From: Jan Masek, PBS/The Print Group Inc.

Dear Mr. Conners,

This is a follow up to two fax transmissions sent to you, dated 5/20/92 and 6/9/92. I have not yet received answers to those two queries which I will reiterate here.

I wish to receive information and forms pertaining to the application of both small and large NID's.

I wish to receive information and forms pertaining to the request for an abbreviated access code. I understand that the rules may change with the current proceeding.

I look forward to receiving the above at your earliest convenience.

Regards

Jan Masek
